

Social Justice

By: Casey & Marius

What made us pick Social Justice?

- **We agree that every person should be treated equally, no matter their race.**
- **We believe in more opportunities.**
- **We believe in Justice**
- **To inform you and others that this world is cruel in so many ways.**

The process in making our website

We did a lot of research regarding to social justice, racism, Black lives matter we used pictures, videos , quotes, and books that clearly stands out to us. First we created section tabs so we can be organized. Started with the home page we explained the social injustice, voting rights, healthcare, racial injustice, income gap, and equality. The the next tabs talked racism, quotes, and books.

Our website about social justice

Our website will be filled with facts on how to bring justice across the world. We will cover topics like...

- Religion based discrimination
- Sexual based discrimination
- Racism
- Educational opportunity for kids

TOOLS WE USED

HTML

Css

Html

HTML is a hypertext Markup Language, a standardized system for tagging text files to achieve font, color, graphic, and hyperlink effects on World Wide Web pages. We chose html because it's to learn, is supported by all Browsers, it's the most friendly search engine, it's the easiest one to edit and it can integrate easily with other languages and the most basic language to use.

CSS

is a computer language for laying out and structuring web pages . This language contains coding elements and is composed of these “cascading style sheets” which are equally called css files. Easier to maintain and update. More consistent in designing. Has more formatting options to do, and easier to use when your presenting different styles to different viewers.

Dynamic

Our dynamic feature is the donate button that's located on our contacts page. It's a dynamic feature because he linked his paypal account to the website and people could donate to the website. That's what makes our cute dynamic.
